

## WHAT IS CLAIMED IS:

1. An aqueous liquid detergent composition comprising:
  - (a) one or more particulate solids; and
  - (b) a polymeric stabilization system.
2. The composition according to Claim 1 wherein said one or more particulate solids includes a peracid.
3. The composition according to Claim 2 wherein said peracid is phthaloylamino peroxyacaproic acid.
4. The composition according to Claim 1 wherein said polymeric stabilization system comprises a polymeric compound selected from the group consisting of ethoxylated nonionic polymers, anionic polyterephthalate polymers, ethoxylated nonionic surfactants, polyvinylacetate, polyvinyl pyrrolidone, polyvinyl N-oxides, polycarboxylates and mixtures thereof.
5. The composition according to Claim 4 wherein said polymeric compound is selected from the group consisting of ethoxylated nonionic polymers, anionic polyterephthalate polymers.
6. The composition according to Claim 1 wherein said one or more particulate solids is present in said composition at a level from 0.1% to 25% by weight of said composition.
7. The composition according to Claim 1 wherein said polymeric stabilization system is present in said composition at a level from 0.01% to 10% by weight of said composition.
8. The composition according to Claim 1 wherein said composition further comprises a suspending agent.
9. The composition according to Claim 8 wherein said suspending agent is xanthan gum.
10. The composition according to Claim 1 wherein said composition further comprises a surfactant.
11. The composition according to Claim 10 wherein said surfactant is selected from the group consisting of anionic, nonionic, cationic, amphoteric, zwitterionic surfactants and mixtures thereof.

12. The composition according to claim 1 wherein said composition further comprises one or more cleaning adjunct materials selected from the group consisting of: surfactants, builders, bleaches, bleach activators, bleach catalysts, enzymes, enzyme stabilizing systems, chelants, optical brighteners, soil release polymers, dye transfer agents, dispersants, suds suppressors, dyes, perfumes, colorants, filler salts, hydrotropes, photoactivators, fluorescers, fabric conditioners, fabric softening agents, hydrolyzable surfactants, preservatives, anti-oxidants, anti-shrinkage agents, anti-wrinkle agents, germicides, fungicides, color speckles, silvercare, anti-tarnish and/or anti-corrosion agents, alkalinity sources, solubilizing agents, carriers, processing aids, pigments and pH control agents.

13. A method for laundering fabrics in need of laundering comprising contacting said fabrics with the aqueous liquid detergent composition of Claim 1.

14. A method for reducing eye irritation properties of liquid compositions comprising one or more particulate solids comprising:

- (a) providing a liquid composition comprising one or more particulate solids;
- (b) adding a polymeric stabilization system.

15. The method according to Claim 14 wherein said liquid composition is an aqueous liquid composition.

16. The method according to Claim 14 wherein said one or more particulate solids includes a peracid.

17. The method according to Claim 16 wherein said peracid is phthaloylamino peroxypropionic acid.

18. The method according to Claim 14 wherein said polymeric stabilization system comprises a polymeric compound selected from the group consisting of ethoxylated nonionic polymers, anionic polyterephthalate polymers, ethoxylated nonionic surfactants, polyvinylacetate, polyvinyl pyrrolidone, polyvinyl N-oxides, polycarboxylates and mixtures thereof.

19. The method according to Claim 18 wherein said polymeric compound is selected from the group consisting of ethoxylated nonionic polymers, anionic polyterephthalate polymers.
